

SPS-300 Series

Advanced ECRs from the World's Leading ECR Builder

Interconnect multiple units to consolidate your sales reporting and share access to peripherals.

Features

- On screen programming simplifies setup and makes changes easy to manage after installation.
- Choose a flat keyboard model for food service or a raised keyboard model for retail environments.
- Connects to popular POS peripherals.

SAM4s SPS-345 and SPS-320 shown with optional card reader.

Best Applications

- Food Service: Quick Service, Sandwich, Deli, Kiosks, Cafeteria, Ice Cream
- Independent Retail Merchants, Especially Retail Scanning
- Simple Franchise Concepts
- Parks, Stadiums, Convention Centers and Other Venues with Many Concession Locations

Choose the Model that Best Fits Your Store

SAM4s SPS-345 for Retail Merchants

Retail, Gift Shops, Convenience Stores, Beer/Wine/Liquor, Specialty Food, Produce, Meat, Main Street Merchants

The traditional raised-key keyboard provides 21 keyboard PLU keys and can be expanded by your SAM4s dealer to 63 PLU keys. Keyboard PLUs act like traditional departments for open-priced entries or can be set as preset price keys. Large key size ensures easy-to-read key labels. Merchants who wish to scan can build their PLU file on the fly using the not-found PLU registration feature.

SAM4s SPS-320, SPS-340 for Food Service

Cafeterias, Quick Service, Concessions, Ice Cream/Frozen Yogurt Stands, Sandwich, Pizza, Coffee, Bakery, Deli's, Bars

Preset PLUs facilitate fast, spill-resistant and accurate registrations. With 150 key locations, the flat keyboard can easily accommodate large menus with preset keys for each item. Where menus change daily with breakfast, lunch or dinner times, the key-sheet under the overlay is easily exchanged. A simplified check tracking feature is available for bars and cafes (local registers only).

Popular Components Included

Thermal Printer(s)

Choose a two-printer model (SPS-340, SPS-345) when a customer receipt and a traditional real-time printed journal is desired for transaction archival. The single printer model is best for receipt-only applications. If you choose the SPS-320 for printing receipts, you can record your journal electronically in the register's memory. Both provide fast, quiet thermal printing. Drop-in loading simplifies paper changing and virtually eliminates paper jamming.

Electronic Journal

The journal can be archived electronically for printing at end-of-day, or can be collected on an SD card. A variety of electronic journal options are available that allow you to quickly audit selected activities.

Electronic Journal Report sorting only voids shown 75% actual size.

Operator Display

The eight-line by 32-character LCD operator screen identifies each item as it is entered. Reports and program options can be viewed and selected from the display.

Rear Display

The 9-digit LED customer display allows consumers to monitor prices as items are entered and view the sale total.

Commercial Grade Cash Drawer

Features a 5 bill, 5 coin insert with adjustable coin dividers and a standard security lock and key. Insert large bills, checks, coupons or card slips through the media slots without opening the drawer.

Secure SD Port

SD Card Utilities include program save/load, report capture, firmware updates plus graphics up and downloading. The SD port, hidden under the printer cover, is secure from tampering.
